VENUS

Drawing Pencils

Packed One Dozen in a Strong and Handsome Box,
Six Boxes in a Carton.

The **VENUS** (Drawing) Pencil has established a new standard of excellence in lead pencils, just as the indelible copying pencil of the same name has amongst pencils of that class.

Will outlast ordinary pencils more than two to one. Does not break readily or smear.

Made in seventeen different degrees, ranging from the very softest to the hardest known. From one extreme to the other without a semblance of grit or the slightest variance of quality.

Just a wee bit better than the best heretofore introduced by anyone anywhere.

Pencil, which is hexagonal, is distinctively and beautifully finished in a reddish brown, so dark it might be mistaken for black. Tone and richness are added by a faint green water line visible through the dark background.

VENUS MEDAL.

Packed One Dozen in a Box, Six Boxes in a Carton.

The increasing demand for a Venus black lead pencil for general purposes, has compelled us to place on the market our Venus MEDAL, which contains a very fine black non-copying lead and is made in three degrees of hardness. This pencil will be found to excel all other medium priced pencils and is particularly adapted for commercial or school purposes. The name VENUS guarantees it to be better for the uses intended than any other medium price pencil; in fact, it ranks as high in its class as the Venus Drawing and Venus Copying do in theirs.

The VENUS MEDAL is finished in a rich purple with a light purple water line running through it. Made in hexagon only, with finest pink eraser, with tip surmounted with a purple band. The three degrees in which the pencil is made are as follows:

As shown by the cut on the right, the pencil is filled with sharpened leads, that are fed in from the top, and when in use are held as rigidly as if encased in wood. The advantages of such a pencil are very readily apparent.
